90kg Pocket Door Kit - 2032mm x 915mm (35 - 44mm Doors)

Variant code: 46292

Pocket Door hardware is a great way to fit a door when space is limited, or when opening in/out would be impossible due to restrictions.

For use within timber wall studs, the pocket door kit enables you to create a door that slides into a cavity wall when it is opened.

Kit comes complete with cavity forming studs, plus the sliding door hardware and comprehensive instructions.
