VEGA is a luminaire made entirely of aluminium with a thickness of only 5mm. The luminaire integrates a special LGP LED cluster which provides a broad, diffused light projection without dot effect. VEGA has been designed for rapid mounting on the surface and on the wall with only two screws. This makes it possible to conceal the power wire directly on the back of the cabinet without having to plan preventive and complex holes in the furniture.

VEGA SDM integrates an infrared electronic switch which switches on and off and dims the brightness of each single luminaire and of all the luminaires connected to it.
