Intumescent Hinge Pads - 100 x 30mm - 4 Pads/Pack - To suit FD30 - 1mm Interdens

Variant code: 2220.INT30

The **Intumescent Hinge Pads** are designed to help maintain the fire integrity of timber fire doors by sealing the recesses behind butt hinges during a fire. Measuring **100 x 30mm** and supplied in convenient **packs of four**, these self-adhesive hinge pads provide a simple and effective solution for fire door installations and maintenance.

Manufactured from **Mono Ammonium Phosphate**, the pads expand when exposed to high temperatures, helping to seal gaps created around door hinges during a fire. Each pad features a **self-adhesive backing** for quick and accurate positioning, reducing installation time while ensuring a secure fit. Available in both **1mm Interdens** for **FD30 fire doors** and **2mm Interdens** for **FD60 fire doors**, they provide a reliable solution for a wide range of certified fire door applications.

Ideal for new installations, fire door maintenance and refurbishment projects, these Intumescent Hinge Pads are manufactured to support professional fire door installations while helping maintain the fire resistance performance of compatible door assemblies.

Product Features

- Intumescent hinge pads for timber fire doors
- Dimensions: 100 x 30mm
- Supplied in packs of 4 pads
- Manufactured from Mono Ammonium Phosphate
- Self-adhesive backing for quick installation
- Available in 1mm Interdens for FD30 fire doors
- Available in 2mm Interdens for FD60 fire doors
- Designed for installation behind butt hinges

Product Benefits

- **Helps maintain the fire integrity of**

timber fire door assemblies
- **Expands under heat to seal gaps around hinge recesses during a fire**
- **Self-adhesive backing enables fast, clean and accurate installation**
- Suitable for both FD30 and FD60 fire door applications
- Reduces installation time without the need for additional adhesive
- Ideal for new fire door installations and refurbishment projects
- Supplied as a practical pack of four pads for a complete hinge set
- Compatible with a wide range of standard butt hinges

Technical Characteristics

- Product Type: Intumescent Hinge Pads
- Dimensions: 100 x 30mm
- Pack Quantity: 4 Pads
- Material: Mono Ammonium Phosphate
- Backing: Self-Adhesive
- Thickness Options: 1mm Interdens or 2mm Interdens
- Fire Door Compatibility: FD30 (1mm) or FD60 (2mm)
- Application: Behind Butt Hinges on Timber Fire Doors

Applications

The **Intumescent Hinge Pads** are suitable for use on **timber fire doors** in **commercial buildings, offices, schools, hospitals, hotels, apartment developments and residential properties**. Installed behind butt hinges, they help maintain the fire resistance performance of certified **FD30 and FD60** fire door assemblies and are ideal for both new installations and fire door maintenance projects.
