

24v 1w PIXEL Recessed Micro Spot Light – 35mm ø, 2m Cable – 2700k Super Warm White – Black

Variant code: LLP24035BKWW

The **24V 1W PIXEL Recessed Micro Spot Light** is a compact LED luminaire designed to deliver precise, symmetrical accent lighting for furniture and display applications. Emitting a **2700K Super Warm White** light, it creates a warm and inviting atmosphere while highlighting displayed items with focused illumination. It is particularly recommended for installation inside **glass display cabinets**.

Manufactured from durable **brass and polycarbonate**, the PIXEL features a recessed design for installation in a groove and fits both **30mm through and blind holes**. Its symmetrical light projection provides consistent accent lighting, making it ideal for display cabinets, shelving and premium furniture applications where discreet lighting is required.

Supplied with a **2 metre power cable**, the PIXEL is suitable for under-cabinet and under-shelf installations in residential and commercial interiors. Its energy-efficient **1W LED** design integrates seamlessly with compatible 24V Domus Line lighting systems.

Product Features

- 24V recessed micro LED spotlight
- Power consumption: 1W
- 2700K Super Warm White light output
- Symmetrical accent light projection
- Designed for recessed installation in a groove
- Suitable for 30mm through and blind holes
- Recommended for glass display cabinet interiors
- Manufactured from brass and polycarbonate
