

24v 5w VEGA LED Under Cabinet Surface Light 2700-4000k - 170 x 50 x 5mm - Temperature Changing - Black

Variant code: LLVDM24080BKCT

The VEGA LED is an aluminium luminaire just 5 mm thick integrating a twin LED cluster (2700 – 4000 K) with diffused light projection and LGP (Light Guide Plate) diffuser that cancels the spot effect.

This VEGA LED configuration is supplied with a two-pole power cable and Micro24 connector: The Temperature Changing sensor is available to purchase separately.

Sold individually or in kits

Kits include 3 spotlights with a 30w power supply or 6 spotlight with a 60w Power Supply plus a static colour temperature sensor wired master, with on-off function and brightness dimmer for adjusting individual luminaires or all those connected to it.

Available in Aluminium and Black finish
