

24v 72w GIRO Surface Mounted Wireless Remote Dimmer Switch with Receiver – 42mm ø – Black

Variant code: LRC24042SE

The **24V 72W GIRO Surface Mounted Wireless Remote Dimmer Switch with Receiver** is a stylish wireless lighting control system designed for compatible **Domus Line 24V single-colour LED luminaires**. Finished in **Black**, the compact surface-mounted remote provides convenient wireless control of compatible lighting, allowing luminaires to be switched on or off and smoothly dimmed without additional control wiring.

The GIRO system comprises a **single-channel wireless remote control** and a receiver unit equipped with **six Micro24 connectors** and an illuminated configuration button for quick pairing and installation. The two-button remote offers intuitive operation, enabling users to control lighting brightness while maintaining a clean, uncluttered furniture design.

Suitable for installations up to **72W at 24V**, the GIRO is ideal for kitchens, wardrobes, shelving and display furniture where flexible wireless lighting control and simple installation are required.

Product Features

- Wireless dimmer switch with receiver for single-colour LED luminaires
- Compatible with 24V Domus Line lighting systems
- Maximum connected load: 72W
- Single-channel wireless remote control
- Surface-mounted design
- Stylish Black finish
- 42mm diameter remote control
- Receiver equipped with 6 Micro24 output connectors
- Illuminated configuration button for quick pairing
- Two-button remote for on/off switching and brightness adjustment
- Plug-and-play Micro24 connection system

Product Benefits

- Provides convenient wireless on/off and dimming control of compatible LED lighting
- Integrated 6-way Micro24 receiver simplifies multi-light installations
- Compact surface-mounted remote eliminates the need for additional control wiring
- Sleek Black finish complements contemporary furniture designs
- Quick installation with plug-and-play Micro24 connections
- Simple pairing using the illuminated configuration button
- Suitable for residential and commercial furniture lighting applications
- Creates a clean and professional wireless lighting solution

Technical Characteristics

- Product Type: Wireless Remote Dimmer Switch with Receiver
- Model: GIRO
- Application: Single-Colour LED Luminaires
- System Voltage: 24V DC
- Maximum Load: 72W
- Control Type: Single-Channel Wireless Remote
- Remote Control: Two-button design
- Receiver Outputs: 6 x Micro24 Connectors
- Configuration: Illuminated Pairing Button
- Remote Diameter: 42mm
- Finish: Black
- Installation: Surface Mounted
- Compatibility: Domus Line 24V Single-Colour Lighting Systems

Applications

The **24V 72W GIRO Surface Mounted Wireless Remote Dimmer Switch with Receiver** is ideal for controlling **under-cabinet lighting, wardrobe lighting, shelving, display cabinets, kitchen furniture, retail displays, office furniture, hotel interiors and bespoke joinery**. Its wireless operation, compact design and integrated Micro24 receiver provide a convenient solution for switching and dimming compatible Domus Line single-colour LED lighting systems.
