24v 8mm Fast Clip Back to Back Connection Block

Variant code: LFF24013BB

The **24V 8mm Fast Clip Back-to-Back Connection Block** is a compact accessory designed to provide a reliable electrical connection between compatible **Domus Line LED tape** sections. Engineered with integrated **multipolar connectors**, it ensures continuous electrical conductivity while maintaining a clean, uninterrupted lighting appearance.

Measuring just **13mm wide**, the Back-to-Back Connection Block allows continuous LED tape installations of up to **6 metres**. Its ultra-compact design minimises gaps between adjoining LED tape sections, helping to deliver uniform illumination with virtually no visible shadows or dark spots.

Designed for quick, tool-free installation, this Fast Clip accessory provides a neat and dependable solution for extending compatible 8mm LED tape in professional residential and commercial furniture lighting applications.

Product Features

- Back-to-back connection block for compatible 8mm LED tape
- Suitable for 24V lighting systems
- Integrated multipolar connectors
- Provides continuous electrical connectivity between LED tape sections
- Ultra-compact 13mm wide design
- Supports continuous LED tape runs up to 6 metres
- Fast Clip connection for quick installation
- Designed to minimise visible gaps between LED tape sections

Product Benefits

- **Maintains electrical continuity across connected LED tape sections**
- **Ultra-slim 13mm profile helps create smooth, shadow-free lighting**
- **Fast Clip design enables quick and straightforward installation**
- Supports continuous lighting runs of up to 6 metres
- Integrated multipolar connectors provide

secure, reliable connections
- Ideal for professional furniture and cabinet lighting installations
- Creates a neat, uninterrupted appearance in linear lighting applications
- Suitable for both residential and commercial projects

Technical Characteristics

- Product Type: Back-to-Back Connection Block
- System Voltage: 24V
- LED Tape Compatibility: 8mm Compatible LED Tape
- Connection Type: Fast Clip with Multipolar Connectors
- Width: 13mm
- Maximum Continuous LED Tape Length: 6m
- Application: Electrical Continuity Between LED Tape Sections
- Compatibility: Domus Line Compatible LED Tape Systems

Applications

The **24V 8mm Fast Clip Back-to-Back Connection Block** is ideal for creating continuous LED tape installations in **under-cabinet lighting, shelving, wardrobes, display cabinets, retail displays, office furniture, hospitality interiors and bespoke joinery**. Its compact design and integrated multipolar connectors ensure reliable electrical continuity while maintaining uniform, shadow-free illumination across long linear lighting runs.
