24v 6mm Fast Slide Connecting Cable - 100mm

Variant code: LFC24100

The **24V 6mm Fast Slide Connecting Cable** is a convenient connection accessory designed for **made-to-measure LED strip lighting installations**. Engineered to provide a fast and reliable connection between compatible 6mm LED strips, this cable simplifies installation while maintaining a neat, professional finish.

Particularly suited to installations requiring **angled or corner connections**, the Fast Slide Connecting Cable offers greater flexibility when routing LED strip lighting around cabinetry, shelving and bespoke furniture. Its compact design allows for quick integration without the need for soldering, making installation faster and more efficient.

Available in **60mm and 100mm lengths**, the cable is ideal for custom LED lighting layouts in residential and commercial furniture applications where precise positioning and dependable performance are essential.

Product Features

- Fast Slide connecting cable for 6mm LED strip lighting
- Designed for 24V LED lighting systems
- Suitable for made-to-measure LED strip installations
- Ideal for angled and corner connections
- Provides quick, reliable strip-to-strip connection
- Compact design for discreet installation
- No soldering required
- Available in 60mm and 100mm lengths
- Suitable for professional and bespoke lighting projects

Product Benefits

- **Provides a quick and secure connection for custom LED strip installations**
- **Ideal for angled layouts where flexible cable routing is required**
- **Reduces installation time by eliminating the need for soldered connections**
- Helps create clean, professional lighting installations
