24v 8mm Fast Clip Connecting Cable - 100mm

Variant code: LFF24100

The **24V 8mm Fast Clip Connecting Cable** is a reliable connection accessory designed to provide secure electrical continuity between compatible 24V LED lighting components. Fitted with **multipolar connectors**, it enables fast, simple installation while maintaining a dependable electrical connection throughout the lighting system.

Ideal for extending or linking compatible LED luminaires and accessories, the Fast Clip Connecting Cable is available in a choice of **50mm, 100mm and 1000mm lengths**, allowing installers to select the most suitable cable for compact or extended lighting installations. The pre-fitted connectors eliminate the need for complex wiring, helping to speed up installation and ensure a professional finish.

Designed for use with compatible 24V lighting systems, this connecting cable is suitable for a wide range of residential and commercial furniture lighting applications.

Product Features

- 24V Fast Clip connecting cable
- Designed for compatible LED lighting systems
- Provides reliable electrical continuity
- Fitted with multipolar connectors
- Quick plug-and-play installation
- Available in 50mm, 100mm and 1000mm lengths
- Ideal for linking compatible lighting components
- Suitable for residential and commercial installations

Product Benefits

- **Provides a secure electrical connection between compatible LED lighting components**
- **Pre-fitted multipolar connectors enable quick and straightforward installation**
- **Multiple cable lengths offer flexibility for a wide range of installation**

requirements

- Reduces installation time by eliminating complex wiring
- Helps achieve a clean and professional lighting installation
- Suitable for both new installations and lighting upgrades
- Reliable performance for furniture and cabinet lighting systems
- Compatible with a variety of 24V LED applications

Technical Characteristics

- Product Type: Fast Clip Connecting Cable
- System Voltage: 24V DC
- Connection Type: Multipolar Connectors
- Function: Electrical Continuity Between Compatible Components
- Available Lengths: 50mm, 100mm and 1000mm
- Installation: Plug-and-Play Connection
- Compatibility: Compatible 24V LED Lighting Systems

Applications

The **24V 8mm Fast Clip Connecting Cable** is ideal for connecting compatible **under-cabinet lights, shelf lighting, wardrobe lighting, display cabinets, kitchen furniture, retail displays, office furniture and bespoke joinery lighting systems**. Available in multiple lengths, it provides a simple, reliable connection solution for professional residential and commercial LED lighting installations.
