24v EASI DISK Radio Control Dimmer - 72mm c/w 36w Driver

Variant code: LRC24072

The **24V EASi DISK Radio Control Dimmer with 36W Driver** is an intelligent wireless lighting control solution designed for **temperature-changing LED luminaires**. Combining a radio frequency remote control with a dedicated **36W EASi DRIVER**, the system enables convenient adjustment of lighting brightness, colour temperature and group control without the need for direct wiring between the controller and luminaires.

The EASi system allows a single **EASi DISK** controller to operate **up to three independent lighting groups**, each capable of containing an unlimited number of compatible EASi DRIVERS. The remote features five intuitive function controls for power, group selection, brightness adjustment and colour temperature control using forward and rewind modes. An illuminated ring provides clear visual feedback, synchronised with the selected lighting function.

Designed for modern residential and commercial furniture lighting, the EASi DISK can operate alongside up to **seven compatible radio controls** controlling the same lighting group. Supplied complete with **two batteries** and a **magnetic wall-mounted support**, it provides a flexible and user-friendly solution for advanced LED lighting installations.

Product Features

- Wireless EASi DISK radio control with 36W EASi DRIVER
- Designed for 24V temperature-changing LED luminaires
- Controls up to three independent lighting groups
- Each group supports an unlimited number of compatible EASi DRIVERS
- Five-button remote control interface
- Functions include On/Off, group selection, brightness adjustment and colour temperature control
- Forward and rewind modes for colour temperature selection

- Integrated illuminated ring synchronised with selected functions
- Supports up to seven radio controls operating the same lighting group
- Supplied with two batteries and magnetic wall mounting support

Product Benefits

- **Provides convenient wireless control of compatible LED lighting systems**
- **Adjusts both brightness and colour temperature to create the ideal lighting atmosphere**
- **Controls multiple lighting zones from a single compact remote**
- Supports unlimited compatible drivers within each lighting group for scalable installations
- Illuminated control ring provides intuitive visual feedback during operation
- Multiple remotes can operate the same lighting group for greater user flexibility
- Magnetic wall mount keeps the controller conveniently accessible when not in use
- Ideal for premium furniture, kitchen and display lighting installations

Technical Characteristics

- Product Type: Radio Control Dimmer with LED Driver
- Model: EASi DISK
- System Voltage: 24V DC
- Driver Output: 36W
- Control Method: Radio Frequency (RF)
- Lighting Compatibility: Temperature-Changing LED Luminaires
- Lighting Groups: Up to 3
- Supported Drivers per Group: Unlimited Compatible EASi DRIVERS
- Remote Functions: On/Off, Group Selection, Brightness, Colour Temperature Forward/Rewind
- Multi-Controller Support: Up to 7 Radio Controls per Group
- Accessories Included: Two Batteries and Magnetic Wall Mount
- Controller Diameter: 72mm

Applications

The **24V EASi DISK Radio Control Dimmer with 36W Driver** is ideal for **kitchen cabinetry, wardrobes, dressing rooms, shelving, display cabinets, retail displays, hospitality interiors,**
