

24v EASI DISK Radio Control Dimmer – 72mm

Variant code: LRC24072

EASi is an advanced control system for Temperature Changing luminaires that combines radio control and special power supplies with an integrated receiving control module. EASi can be used to create lighting systems in which EASi DISK can control up to 3 groups containing an unlimited number of EASi DRIVERS.

EASi DISK is a radio control for EASi DRIVER power supply (sold separately).

EASi DISK has five function keys:

- Control module On–Off
- Group selectors
- Brightness
- Light & colour selectors with “forward” and “rewind” modes

EASi integrates a luminous ring synchronised with the radio control selectors. EASi DISK may control the same group of luminaires in combination with other radio controls (up to a maximum of seven).

Supplied with two batteries and a magnetic support for wall mounting.
