24v EASi Power Supply Only with 2.4GHz RF Receiver with 6 Built-in Micro Connectors - 36w

Variant code: LDE24366

The **24V EASi Power Supply with 2.4GHz RF Receiver** is an intelligent LED driver designed for use with **Temperature Changing LED luminaires**. Combining a high-quality 24V electronic power supply with an integrated **2.4GHz radio frequency receiver**, the EASi system enables wireless control of colour temperature and lighting functions without the need for separate receiver modules.

Developed as part of the innovative **Domus Line EASi lighting system**, this power supply works seamlessly with compatible **EASi DISK wireless controllers**, allowing up to three independently controlled lighting groups with an unlimited number of connected EASi drivers. Featuring **six built-in Micro24 output connectors**, installation is quick and tidy, making it ideal for professional furniture lighting installations.

Suitable for residential and commercial furniture, the EASi driver is available in **36W and 72W** power ratings and provides reliable, efficient power for 24V Temperature Changing LED lighting systems.

Product Features

- Integrated 2.4GHz RF wireless receiver
- 24V electronic LED power supply
- Designed for Temperature Changing LED luminaires
- Compatible with the Domus Line EASi control system
- Six built-in Micro24 output connectors
- Supports wireless control via EASi DISK controller
- Allows up to three independently controlled lighting groups
- Available in 36W and 72W power outputs
- Compact IP20 driver for indoor installations
- Simple plug-and-play Micro24 connection system

Product Benefits

- **Combines LED driver and wireless**

Tel: 01626 333900
Email: info@swshardware.com

receiver into one compact unit for simplified installation
- **Supports wireless temperature changing control without additional receiver modules**
- **Six integrated Micro24 connectors enable fast, organised multi-light installations**
- Allows flexible control of up to three independent lighting groups
- Compatible with an unlimited number of connected EASi drivers within each group
- Provides reliable, efficient power for 24V LED lighting systems
- Ideal for modern furniture lighting requiring adjustable white light
- Suitable for professional residential and commercial installations

Technical Characteristics

- Product Type: LED Power Supply with Integrated RF Receiver
- System: Domus Line EASi
- Output Voltage: 24V DC
- Wireless Frequency: 2.4GHz RF
- Protection Rating: IP20
- Power Options: 36W or 72W
- Connection System: Micro24
- Outputs: 6 Built-in Micro24 Connectors
- Compatible Lighting: Temperature Changing LED Luminaires
- Compatible Controller: EASi DISK Wireless Controller
- Lighting Groups Supported: Up to 3 Independent Groups

Applications

The **24V EASi Power Supply with 2.4GHz RF Receiver** is ideal for powering and controlling **temperature changing LED lighting** in **kitchen cabinets, wardrobes, display cabinets, shelving, retail displays, office furniture, hotel interiors and bespoke joinery**. Designed for use with compatible **Domus Line EASi** components, it provides efficient wireless control and dependable power distribution for sophisticated residential and commercial furniture lighting systems.

Property	Value
Voltage	220–240V AC
Dimensions	218 × 60 × 16.5mm
