24v Extension Cable with Single Male & Female Micro Connectors - 2m

Variant code: LPA242000

The **24V Extension Cable with Single Male & Female Micro24 Connectors** is a practical accessory designed to extend connections between compatible **Domus Line 24V lighting components**. Featuring a **2000mm extension cable** with pre-fitted **male and female Micro24 connectors**, it provides a quick and reliable plug-and-play solution wherever additional cable length is required.

Designed to maintain secure electrical continuity, this extension cable is ideal for extending connections between LED luminaires, sensors, switches, control modules and power supplies without the need for cutting, soldering or additional wiring. Its Micro24 connector system enables fast installation while maintaining a neat and professional lighting setup.

Suitable for residential, commercial and bespoke furniture lighting installations, this extension cable offers the flexibility needed when positioning lighting components over greater distances.

Product Features

- 24V extension cable for compatible Domus Line lighting systems
- 2000mm cable length
- Single male Micro24 connector
- Single female Micro24 connector
- Plug-and-play installation
- Maintains reliable electrical continuity
- Ideal for extending lighting, sensor and accessory connections
- Suitable for professional furniture lighting installations

Product Benefits

- **Extends Micro24 connections without cutting or rewiring**
- **Plug-and-play connectors provide quick and simple installation**
- **Offers greater flexibility when positioning lighting components**
- Maintains reliable electrical performance

throughout the system
- Ideal for connecting luminaires, sensors and power supplies over longer distances
- Reduces installation time and complexity
- Suitable for both new installations and retrofit projects
- Compatible with a wide range of Domus Line 24V lighting products

Technical Characteristics

- Product Type: Extension Cable
- System Voltage: 24V DC
- Cable Length: 2000mm
- Connector Type: 1 x Male Micro24, 1 x Female Micro24
- Installation: Plug-and-Play
- Compatibility: Domus Line 24V Micro24 Lighting Systems

Applications

The **24V Extension Cable with Single Male & Female Micro24 Connectors** is ideal for extending connections between **LED luminaires, sensors, dimmers, switches, power supplies and control modules** in **under-cabinet lighting, wardrobes, shelving, display cabinets, kitchen furniture, retail displays, office furniture, hospitality interiors and bespoke joinery**. Its plug-and-play Micro24 connector system provides a reliable and professional solution for flexible furniture lighting installations.

Property	Value
Voltage	24V DC
Length	2m
Connection Type	1 x Male Micro24 & 1 x Female Mirco24
