

## 24v Power Cable for 8mm Flexible Tape – 2000mm

**Variant code: LFF242000**

The **24V Power Cable for 8mm Flexible LED Tape** is a dedicated connection accessory designed to provide a reliable power supply to compatible **Domus Line 8mm flexible LED tape**. Measuring **2000mm** in length, it features an innovative **Plug & Play connection system** that simplifies installation while eliminating the need for complex cable soldering.

Engineered with integrated **multipolar connectors**, the cable ensures dependable electrical continuity between the power supply and compatible LED tape. Its Plug & Play design allows custom cable lengths to be supplied and installed quickly, making it ideal for professional furniture lighting projects where flexibility and efficiency are essential.

Suitable for residential and commercial installations, this power cable provides a neat, secure and reliable connection for under-cabinet, shelving, wardrobe and display lighting applications using compatible Domus Line flexible LED tape.

---

### Product Features

- 24V power cable for compatible 8mm flexible LED tape
- 2000mm cable length
- Innovative Plug & Play connection system
- Integrated multipolar connectors
- Ensures reliable electrical continuity
- No cable soldering required
- Suitable for custom cable length installations
- Quick and simple installation
- Compatible with Domus Line 8mm flexible LED tape systems

---

### Product Benefits

- **Provides a secure and reliable power connection for compatible 24V LED tape**
- **Plug & Play design eliminates the need for complex cable soldering**
- **Integrated multipolar connectors ensure dependable electrical**

**continuity**

- 2m cable offers flexible installation options within furniture and cabinetry
- Helps create clean and professional lighting installations
- Suitable for both new installations and maintenance projects
- Reduces installation time with simple connector-based assembly
- Designed for residential and commercial furniture lighting applications

---

**Technical Characteristics**

- Product Type: Power Cable
- System Voltage: 24V
- Compatible LED Tape Width: 8mm
- Cable Length: 2000mm
- Connection System: Plug & Play
- Connector Type: Multipolar Connectors
- Application: Power Connection for Flexible LED Tape
- Compatibility: Domus Line 8mm Flexible LED Tape Systems

---

**Applications**

The **24V Power Cable for 8mm Flexible LED Tape** is ideal for connecting compatible **8mm flexible LED tape** in **under-cabinet lighting, wardrobes, shelving, display cabinets, retail displays, office furniture, hospitality interiors and bespoke joinery**. Its Plug & Play system and integrated multipolar connectors provide a fast, reliable and professional power connection for modern furniture lighting installations.

| Property         | Value                  |
|------------------|------------------------|
| Voltage          | 24V DC                 |
| Width (mm)       | 8                      |
| Cable Length (m) | 2000                   |
| Connection Type  | Micro24 Male to CH 3.0 |
