4 Way Distributor Block for Premium LED Lights inc Premium Input Lead

Variant code: LPA40000

4-way TOP splitter cable (TOP4) for connecting multiple LED fittings to a single TOP output socket.

Most of the LED drivers / power supplies that use a TOP output connector, are supplied with a 6-way output connector.

This 4-way adapter will split any of the original outputs into 4 - just like a 4-way mains adapter, only for low voltage TOP connectors.
