Sugatsune Mounting Bracket - 90° Back mount - Nickel

Variant code: CFD90

Sugatsune Mounting Bracket - 90° Back Mount - Nickel is designed to provide secure and precise installation for flap support and damper systems in cabinet applications. Manufactured by **Sugatsune**, a globally recognised specialist in precision hardware, this bracket enables reliable mounting and optimal positioning of compatible lift assist and damping mechanisms.

Engineered with a **90° back mount configuration**, the bracket allows installation to the rear panel or internal cabinet structure, ensuring correct alignment and stable fixing of the associated hardware. This positioning is critical in achieving consistent performance, particularly in applications where controlled flap movement and support are required.

Designed to support systems where **maximum door moment must be considered**, the bracket contributes to maintaining structural stability and correct load distribution. When paired with the appropriate Sugatsune damper or lift assist mechanism, it ensures reliable operation across a range of flap sizes and weights. Proper specification based on **door size, weight and moment calculation** is essential for optimal performance.

Manufactured from durable materials with a **Nickel finish**, the bracket offers a clean, professional appearance while ensuring long-term reliability. Its compact design allows for efficient installation without compromising cabinet space or internal layout.

Product Features

- **90° back mount bracket for flap systems**
- Designed for **Sugatsune damper and lift assist compatibility**
- Provides **secure and stable mounting position**
- Supports **correct hardware alignment**

SWS HARDWARE

- Durable **Nickel finish**
- Compact design for **efficient installation**

Product Benefits

- Ensures **accurate positioning of flap support systems**
- Supports **applications with varying maximum door moment requirements**
- Improves **overall system stability and performance**
- Enhances **installation efficiency and reliability**
- Maintains **clean and professional cabinet interior appearance**
- Contributes to **long-term durability of hardware systems**

Technical Characteristics

- **90° back mounting configuration**
- Compatible with **Sugatsune flap dampers and lift systems**
- Designed to support **door moment-based applications**
- Suitable for **various flap sizes depending on system specification**
- Engineered for **stable and precise installation**

Applications

This mounting bracket is used in **kitchen cabinetry, storage units, office furniture and fitted joinery** where flap support or damper systems are installed. It is particularly suited to applications where **maximum door moment must be considered**, ensuring stable and reliable operation of lift assist mechanisms. Commonly specified in **residential and light commercial interiors**, it supports safe, controlled and consistent flap functionality.
