Adjustable Floating Shelf Support Bracket - 120N at 150mm - 150mm

Variant code: AFS10150

Adjustable Floating Shelf Support Bracket is a precision-engineered concealed shelf support designed to create strong, modern floating shelf installations with no visible brackets. Providing a **load capacity of 120N at 150mm from the wall**, this **150mm** support delivers excellent stability while maintaining the clean, minimalist appearance expected from contemporary shelving systems. Ideal for residential, commercial and retail environments, it combines concealed fixing with simple post-installation adjustment for a perfect finish.

Featuring an innovative **offset cam adjustment mechanism**, the shelf can be levelled quickly and accurately after installation. Simply locate the shelf onto the supports, adjust the level using the cam mechanism, then slide the shelf into its final position for a precise fit every time. This easy adjustment process reduces installation time while ensuring shelves remain perfectly aligned.

Manufactured for professional furniture makers, joiners and installers, the Sugatsune Adjustable Floating Shelf Support offers dependable concealed support with excellent load performance and straightforward adjustment. It is ideal for creating elegant floating shelves without compromising strength or appearance.

Product Features

- Concealed adjustable floating shelf support bracket
- 150mm support length
- Load capacity of 120N at 150mm from the wall
- Integrated offset cam levelling adjustment
- Allows post-installation shelf alignment
- Concealed fixing for a floating shelf appearance
