

Blum Angled Spacer Plate – +5° Obtuse – Nickel – 3mm

Variant code: 171A5040

Blum Angled Spacer Plate – +5° Obtuse – Nickel – 3mm is designed to assist with accurate hinge positioning where cabinet construction requires angular correction. Manufactured by **Blum**, a recognised specialist in precision cabinet hardware, this spacer plate integrates with compatible **Blum CLIP top hinge systems** to maintain correct hinge alignment and dependable door movement in specialised cabinet installations.

Providing a **+5° obtuse angle**, the spacer plate allows hinges to be mounted correctly when working with angled cabinet sides or diagonal cabinet constructions. The **3mm spacing** helps achieve the correct hinge offset, ensuring smooth hinge operation, consistent door gaps and reliable door alignment within the cabinet structure.

Manufactured from durable **nickel-plated steel**, the spacer plate offers strength, corrosion resistance and a neutral appearance suitable for a wide range of cabinet interiors. It integrates seamlessly between the hinge and cabinet surface and is compatible with **hinges using different boss fixing types depending on the selected variant**, allowing flexibility across multiple hinge configurations and installation requirements.

Product Features

- **+5° obtuse angled spacer plate** for specialised cabinet installations
- **3mm spacing** to assist with hinge positioning
- Designed for use with **Blum CLIP top hinge systems**
- Durable **nickel-plated steel construction**
- Compatible with **multiple hinge boss fixing types depending on variant**
- Compact design integrates easily with standard hinge installations

Product Benefits

- Enables accurate hinge installation on angled cabinet sides
- Supports precise door alignment and consistent reveals
- Helps maintain smooth hinge movement in

angled cabinet layouts

- Provides flexibility across different hinge fixing configurations
- Improves installation accuracy in bespoke cabinetry
- Suitable for residential and light commercial furniture applications

Technical Characteristics

- **+5° obtuse angle** spacer configuration
- **3mm spacer height**
- Steel construction with **nickel-plated protective finish**
- Compatible with **Blum CLIP top hinge systems**
- Designed to support hinges with **different boss fixing types depending on variant**

Applications

This spacer plate is intended for **cabinet installations where hinge mounting requires angular correction**, such as angled cabinet sides, diagonal cabinetry and bespoke furniture constructions. The **+5° obtuse configuration with 3mm spacing** allows hinges to be positioned correctly, ensuring smooth door movement and accurate alignment when used with compatible Blum hinge systems in kitchens, fitted furniture and custom joinery projects.
