Anti-Ligature Pull Handle on Back Plate - Satin Stainless Steel

Variant code: ZPSALP.SSS

The **Anti-Ligature Pull Handle on Back Plate** is a specialist door pull designed to help reduce ligature risks in environments where occupant safety is paramount. Manufactured from high-quality **Grade 304 stainless steel** with a durable **Satin Stainless Steel (SSS)** finish, the handle features a smooth, rounded profile that minimises potential ligature points while providing a secure and comfortable grip for everyday operation.

Engineered for demanding healthcare, mental health and custodial environments, this anti-ligature pull handle combines robust construction with contemporary styling. The back plate design provides additional strength and stability while ensuring straightforward installation on timber or metal doors. Its corrosion-resistant stainless steel construction delivers long-lasting performance, making it suitable for high-traffic applications where durability and hygiene are essential.

Ideal for new-build healthcare facilities, refurbishment projects and secure accommodation, the Anti-Ligature Pull Handle on Back Plate offers a reliable, low-maintenance solution that supports safer environments without compromising on functionality or appearance.

Product Features

- Anti-ligature pull handle on back plate
- Manufactured from Grade 304 stainless steel
- Premium Satin Stainless Steel (SSS) finish
- Smooth rounded design to help minimise ligature points
- Strong back plate for enhanced stability
- Corrosion-resistant construction
- Suitable for timber and metal doors
- Designed for high-use commercial environments

Product Benefits

- **Helps reduce ligature risks in safety-critical environments**
- **Grade 304 stainless steel provides**
