Architectural Escutcheon - Euro Profile - Satin Anodised Aluminium

Variant code: 1405.13.SAA

Architectural Escutcheon is a high-quality finishing accessory designed to complement modern door hardware while providing a neat, professional appearance around lock or keyway cut-outs. Available in **Blank, Lever Profile and Euro Profile** configurations, and finished in **Satin Stainless Steel, Polished Stainless Steel or Satin Anodised Aluminium**, these escutcheons coordinate seamlessly with matching architectural lever handles and door furniture for a consistent, contemporary look.

Manufactured from premium **stainless steel or aluminium**, each escutcheon features a slim **50-52mm diameter rose** with an **8mm projection**, creating a low-profile finish that enhances the overall appearance of the door. The concealed rose design provides a clean architectural aesthetic while offering excellent durability and corrosion resistance for long-term performance. Suitable for commercial, public and residential applications, these escutcheons are supplied individually, allowing customers to order the required quantity for their installation.

Ideal for both new installations and refurbishment projects, these architectural escutcheons provide a durable and coordinated finishing solution for a wide range of internal doors.
