Blum Aventos Clip Top Centre Hinge Set - 134° Unsprung for Wooden Fronts & Wide Aluminium Frames - Nickel

Variant code: 78Z5500T

Blum AVENTOS hinge set is designed to provide secure and reliable front fixing for lift system applications using wooden fronts and wide aluminium frames. As part of the Blum AVENTOS system, this hinge set plays a critical role in connecting the cabinet front to the lift mechanism, ensuring stable operation and precise movement. Blum is globally recognised for precision-engineered cabinet hardware, and this component reflects the brand's commitment to system integration, durability and consistent performance.

Specifically developed for compatibility with AVENTOS lift systems, the hinge set accommodates both traditional wooden cabinet fronts and wide aluminium frame fronts, offering flexibility across different cabinet designs. It ensures a secure mechanical connection while allowing the lift system to operate smoothly and efficiently. The design supports accurate alignment of the cabinet front, helping maintain consistent gaps and a professional finish across installations. Its construction allows it to integrate seamlessly within the overall AVENTOS system, ensuring compatibility with other Blum components and preserving system reliability.

Product Features

- Designed for **Blum AVENTOS lift systems**
- **Hinge set** for front fixing applications
- Suitable for **wooden fronts and wide aluminium frames**
- Provides **secure connection** between front and mechanism
- Supports **stable and controlled lift system movement**
- Compatible with Blum **AVENTOS system components**
- Designed for **accurate front alignment**

Product Benefits

Tel: 01626 333900
Email: info@swshardware.com

- Ensures reliable connection for consistent lift performance
- Supports flexibility across different front materials
- Enables precise alignment and uniform cabinet appearance
- Contributes to smooth and stable operation of lift systems
- Integrates seamlessly within Blum AVENTOS systems
- Suitable for residential and light commercial cabinetry

Technical Characteristics

- Designed for use with **Blum AVENTOS lift mechanisms**
- Compatible with **wooden and wide aluminium frame fronts**
- Must be installed as part of a **complete AVENTOS system**
- Intended for **internal cabinet installation**
- Requires correct positioning for optimal performance
- Installation should follow Blum **technical guidelines**

Applications

This hinge set is intended for use in AVENTOS lift system installations where cabinet fronts are made from wood or wide aluminium frames. It is commonly specified in kitchens, fitted furniture and modern cabinetry projects where reliable front fixing and smooth lift operation are required. By providing a secure and adaptable connection between the cabinet front and lift mechanism, it supports consistent performance and a professional finish in both residential and light commercial environments.

Property	Value
Opening angle (°)	134
Closing Mechanism	Unsprung
Flange Width (mm)	57
Flange Length (mm)	20
Flange Height (mm)	3
