

Blum Aventos HF Lift Mechanism – Power Factor 9000 – 17250

Variant code: 20F2800

Aventos HF Lift Mechanism (PF 2600–5500):
Powerful Bi-Fold Cabinet Solution

Achieve Seamless Cabinet Access with the
Aventos HF Lift System (Power Factor
2600–5500)

The Aventos HF lift mechanism from Blum provides a premium solution for large, bi-fold cabinet fronts. Specifically designed for cabinets with a power factor range of 2600 to 5500, this system ensures effortless opening and closing, even with heavy doors.

Key Features and Benefits:

- **Optimal Power Factor (2600–5500):**
Perfectly suited for a wide range of cabinet sizes and weights, providing reliable and consistent performance.
- **Smooth and Silent Operation:**
Experience the renowned Blum quality with a fluid, quiet lifting motion.
- **Bi-Fold Design:** Ideal for wall cabinets with large fronts, offering unobstructed access to cabinet contents.
- **Easy Installation and Adjustment:**
Simplified assembly and precise adjustment for perfect alignment.
- **Durable and Reliable:** Built to last with high-quality materials and engineering.
- **Blum Quality:** Trust in the precision and durability of a leading hardware manufacturer.

Who is this for?

This Aventos HF lift mechanism is ideal for:

- Kitchen designers and installers seeking premium cabinet hardware.
- Homeowners undertaking kitchen renovations or new builds.
- Cabinet makers looking for reliable and high-performance lift systems.
