

Blum Aventos HK-S 100° Open Angled Stop

Variant code: 20K7A41

Blum AVENTOS HK-S 100° Open Angled Stop: Enhance Your Cabinet Functionality

Upgrade your overhead cabinet doors with the **AVENTOS HK-S 100° Open Angled Stop** from Blum, a leader in innovative furniture hardware. This high-quality component is designed to provide smooth and controlled opening for smaller, single front lift systems.

The **AVENTOS HK-S 100° Open Angled Stop** ensures that your cabinet door opens to a precise 100-degree angle, offering optimal access while preventing over-extension.

This feature is particularly valuable in kitchens, bathrooms, and other spaces where maximising functionality and space efficiency is crucial.

Key Features and Benefits:

- **Precise 100° Opening Angle:** Provides consistent and reliable door positioning.
- **Angled Stop Functionality:** Prevents the door from opening beyond the desired angle, protecting your cabinets.
- **Blum Quality and Durability:** Engineered with high-grade materials for long-lasting performance.
- **Smooth and Silent Operation:** Ensures a refined and user-friendly experience.
- **Ideal for Smaller Overhead Cabinets:** Perfect for compact spaces and single front applications.
- **Easy Installation:** Designed for straightforward installation, saving you time and effort.
- **Enhances Cabinet Functionality:** Improves accessibility and overall cabinet usability.

Whether you're a professional cabinet maker or a D.I.Y enthusiast, the **AVENTOS HK-S 100° Open Angled Stop** delivers the reliability and performance you expect from Blum. Enhance the functionality and longevity of your overhead cabinets with this essential hardware component.
