Blum Aventos HK Top Lift Mechanism - Servo-Drive Compatible - Power Factor 3200-9000

Variant code: 22K2900

Blum Aventos HK Top Lift Mechanism - Servo-Drive Compatible is a **stay lift system solution** designed for overhead cabinetry where compact design and controlled movement are required. Manufactured by Blum, a globally recognised brand in furniture fittings, the Aventos HK system is engineered to deliver reliable performance and smooth operation for single front lift-up doors.

The mechanism is designed for compatibility with **Servo-Drive**, allowing for both manual and electrical opening options. This provides flexibility in modern kitchen and fitted furniture applications, supporting enhanced user convenience. Available across multiple **power factor ranges**, the system can be accurately specified to suit different cabinet sizes and front weights, ensuring balanced and controlled movement.

The Aventos HK system is particularly suited to smaller and mid-sized cabinets, offering a space-efficient solution where simple upward opening is required. Integrated adjustment features allow for precise alignment during installation, while the compact design supports clean cabinet interiors and efficient use of space.

Product Features

- **Stay lift mechanism** for overhead cabinet applications
- Compatible with Blum Aventos HK lift system configurations
- **Servo-Drive compatible** for electrical or manual operation
- Available in multiple **power factor ranges** for flexible specification
- Compact design suitable for smaller cabinet formats
- Smooth and controlled opening and closing motion

Product Benefits

- Provides ergonomic access to cabinet contents

- Supports controlled and stable door movement
- Enhances usability with optional Servo-Drive integration
- Optimises space in compact cabinet designs
- Ensures consistent performance across cabinet sizes
- Contributes to a clean and modern cabinet appearance

Technical Characteristics

- Available in power factor ranges 420–1610, 930–2800, 1730–5200, 3200–9000
- Designed for Aventos HK lift system applications
- Requires correct selection based on cabinet size and front weight
- Compatible with Blum fixing brackets and accessories
- Adjustable for alignment and positioning
- Engineered for long-term durability and reliability

Applications

Blum Aventos HK Top Lift Mechanism is suitable for residential and commercial cabinetry, particularly in kitchen wall units and overhead storage where single front lift-up doors are preferred. It is ideal for compact and mid-sized cabinets, providing efficient access while maintaining a clean and uncluttered workspace. The system is commonly used in modern kitchens and fitted furniture projects where functionality, flexibility and consistent performance are required.
