Variant code: 22K2500

Effortless Upper Cabinet Access with the Aventos HK Top Lift Mechanism (Power Factor 420–1610)

Tired of struggling with heavy, awkward upper cabinet doors? Upgrade your kitchen, living room, or office storage with the **Aventos HK Top Lift Mechanism**, designed for smooth, silent, and reliable operation. This premium lift system allows for easy access to your wall cabinets, providing a seamless and sophisticated user experience.

Specifically, this listing features the Aventos HK Top Mechanism with a Power Factor of 420–1610. This versatile range makes it ideal for a wide variety of cabinet sizes and door weights, ensuring optimal performance and effortless opening and closing.

Key Features & Benefits:

- **Smooth & Silent Operation:** Experience the difference of high-quality engineering. The Aventos HK Top glides open and closes with minimal effort and noise.
- **Optimal Power Factor (420–1610):** This broad power factor range accommodates a variety of cabinet door dimensions and weights, providing flexible solutions for your design needs.
- **Easy Access to Upper Cabinets:** No more reaching or straining. The HK Top lifts the door upwards, providing clear and unobstructed access to your cabinet contents. (**Search terms: Upper Cabinet Lift, Wall Cabinet Mechanism, Overhead Cabinet Hardware**)
- **Space-Saving Design:** The HK Top is designed to minimise space requirements, making it perfect for even smaller kitchens and rooms.
- **Adjustable Opening Angle:** Customise

the opening angle to suit your specific requirements and preferences.

- **Durable & Reliable:** Built with high-quality materials, the Aventos HK Top is designed for long-lasting performance and reliability. (**Search terms: Durable Cabinet Hardware, Reliable Lift Mechanism**)
- **Perfect for Kitchens, Living Rooms, and Offices:** Enhance the functionality and aesthetics of any space with this premium lift system. (**Search terms: Kitchen Cabinet Lift, Living Room Cabinet Hardware, Office Cabinet Mechanism**)
- **Aventos Quality:** Trust in the renowned quality and precision of Blum Aventos hardware.

Why Choose the Aventos HK Top with Power Factor 420-1610?

This specific power factor range is crucial for ensuring your cabinet door functions correctly. If your door is too heavy or too light for the mechanism, it will not operate smoothly or safely. By selecting the **Aventos HK Top 420-1610**, you're choosing a versatile and reliable solution that will provide years of trouble-free performance.

Upgrade your cabinets today with the Aventos HK Top Mechanism (Power Factor 420-1610) and experience the difference of premium quality and effortless convenience.
