

Blum Aventos Servo-Drive Cover Cap Set – For HK Top Lift System – Light Grey

Variant code: 23K8000LG

Blum AVENTOS SERVO-DRIVE cover cap set is designed to provide a clean and finished appearance for HK top lift systems fitted with SERVO-DRIVE technology. As part of Blum's integrated lift system range, this component conceals the drive unit and associated fittings, ensuring a neat and coordinated internal cabinet presentation. Blum is globally recognised for precision-engineered hardware, and this cover cap set reflects the same attention to detail, combining functional protection with a refined aesthetic finish.

Specifically developed for the AVENTOS HK top lift system, the cover caps fit securely over the SERVO-DRIVE components, protecting them from dust, debris and accidental contact while maintaining accessibility for servicing when required. The **dark grey finish** is designed to match Blum system components, creating a consistent and professional appearance within the cabinet interior. Its form-fitting design ensures compatibility without interfering with the operation of the lift mechanism or drive unit, preserving smooth system performance.

Product Features

- Designed for **Blum AVENTOS SERVO-DRIVE HK systems**
- **Cover cap set** for drive unit and components
- Provides **protective enclosure** for internal hardware
- **Dark grey finish** for coordinated system appearance
- Precision-fit design for **secure and stable installation**
- Compatible with Blum **SERVO-DRIVE HK top lift systems**
- Maintains access for **maintenance and servicing**

Product Benefits

- Enhances cabinet interior with a **clean, finished appearance**

- Protects internal components from **dust and accidental damage**
- Maintains consistent aesthetic across Blum systems
- Supports long-term durability of installed components
- Ensures system remains visually organised and professional
- Suitable for high-quality residential and commercial installations

Technical Characteristics

- Designed specifically for **AVENTOS HK SERVO-DRIVE systems**
- Must be installed with compatible Blum **HK lift mechanisms**
- Intended for **internal cabinet use only**
- Clips or fits securely onto designated system components
- Does not interfere with **lift or drive operation**
- Installation should follow Blum **technical instructions**

Applications

This cover cap set is intended for use in AVENTOS HK top lift system installations fitted with SERVO-DRIVE, where a clean and protected internal cabinet finish is required. It is commonly specified in kitchens, fitted furniture and high-end cabinetry projects where both functionality and internal presentation are important. By concealing and protecting system components, it contributes to a refined, professional installation suitable for residential and light commercial environments.
