Blum Aventos Servo-Drive Motor Pack - For HK Top Lift System - Deep Grey

Variant code: 23KA000

Blum AVENTOS SERVO-DRIVE motor pack is a dedicated drive unit designed to deliver electrically assisted opening for AVENTOS HK top lift systems. As part of Blum's advanced SERVO-DRIVE technology, this motor pack enables effortless operation of cabinet fronts with a light touch, enhancing usability and accessibility in modern cabinetry. Blum is globally recognised for precision-engineered hardware, and this component reflects that commitment to seamless integration, reliability and user-focused performance.

Specifically engineered for the AVENTOS HK top lift system, the motor pack works in conjunction with compatible Blum power supply units, switches and distribution components to provide smooth and consistent opening action. A light press on the cabinet front activates the system, allowing the lift mechanism to open automatically, while closing remains controlled through the mechanical lift system. The compact and purpose-built design allows discreet installation within the cabinet, maintaining a clean internal layout without compromising performance.

Product Features

- Designed for **Blum AVENTOS SERVO-DRIVE HK systems**
- **Motor pack drive unit** for electrically assisted opening
- Enables **touch-activated opening functionality**
- Provides **smooth and controlled lift movement**
- Compatible with Blum **SERVO-DRIVE power supply and control components**
- Compact design for **discreet cabinet integration**
- System-matched component for reliable performance

Product Benefits

- Enhances user comfort with **effortless cabinet opening**

Tel: 01626 333900
Email: info@swshardware.com

- Supports **handle-less cabinet design**
- Provides consistent and reliable opening performance
- Improves accessibility for overhead cabinet applications
- Integrates seamlessly within the Blum AVENTOS system
- Suitable for residential and light commercial interiors

Technical Characteristics

- Designed for use with **AVENTOS HK top lift systems**
- Requires compatible Blum **SERVO-DRIVE power supply unit**
- Must be installed as part of a **complete SERVO-DRIVE system**
- Compatible with Blum **switches, cables and distribution components**
- Intended for **internal cabinet installation**
- Installation should follow Blum **technical guidelines and instructions**

Applications

This motor pack is intended for use in AVENTOS HK top lift system installations where electrically assisted opening is required. It is commonly used in wall cabinets in kitchens, fitted furniture and other cabinetry applications where ease of access and user comfort are important. Particularly suited to handle-less cabinet designs, it enables smooth, touch-activated opening while maintaining clean external lines and reliable system performance in both residential and light commercial environments.
