Blum Aventos HK-XS Blumotion Lift Mechanism Set - Power Factor 200-1000

Variant code: 20K1100

Blum AVENTOS HK-XS BLUMOTION Lift Mechanism Set - Power Factor 200–1000 is designed for compact stay lift applications, enabling smooth and controlled upward opening of cabinet doors. Engineered as part of Blum's AVENTOS lift system range, this mechanism integrates **BLUMOTION soft-close technology**, ensuring quiet and damped closing without the need for additional components.

The HK-XS system is ideal for smaller wall cabinets, offering a space-efficient solution where internal clearance is limited. The lift mechanism allows the cabinet front to open upwards in a single-panel motion, providing improved accessibility while maintaining a clean and ergonomic cabinet design.

The **Power Factor range 200–1000** defines the lifting capacity of the mechanism when matched with cabinet height and door weight, ensuring optimal performance across a range of applications. Supplied as a **left and right mechanism set**, it provides balanced operation and consistent movement.

Product Features

- Designed for **Blum AVENTOS HK-XS lift systems**
- Integrated **BLUMOTION soft-close mechanism**
- Suitable for **compact and small cabinet applications**
- **Power Factor range 200–1000** for defined lifting capacity
- Supplied as **left and right mechanism set**
- Smooth upward opening motion

Product Benefits

- Provides **quiet and controlled closing**
- Improves access to cabinet interiors
- Ideal for compact cabinet designs
- Ensures stable and balanced door movement

- Supports ergonomic and space-efficient solutions

Technical Characteristics

- Requires compatible **HK-XS fittings and brackets**
- Power Factor determines correct application based on door size and weight
- Designed for integration within Blum AVENTOS lift system range
- Suitable for various cabinet heights within specified range
- Correct specification ensures optimal performance

Applications

This lift mechanism set is suitable for kitchen wall cabinets, storage units and fitted furniture where compact upward-opening doors are required. It is particularly effective in smaller cabinets or installations with limited space, providing smooth operation, reliable performance and improved accessibility in residential and light commercial environments.
