Blum Aventos HK-XS Blumotion Lift Mechanism Only - Power Factor 500-1500

Variant code: 20K1301

Blum AVENTOS HK-XS BLUMOTION Lift Mechanism - Power Factor 500–1500 is designed for compact stay lift applications, enabling smooth and controlled upward opening of cabinet doors. Engineered as part of Blum's AVENTOS lift system range, this mechanism integrates **BLUMOTION soft-close technology**, ensuring quiet and damped closing without the need for additional components.

The HK-XS system is suitable for small to medium cabinet applications, offering a space-efficient solution where internal clearance is limited. The lift mechanism allows the cabinet front to open upwards in a single-panel motion, improving accessibility while maintaining a clean and ergonomic cabinet design.

The **Power Factor range 500–1500** defines the lifting capacity of the mechanism when matched with cabinet height and door weight, ensuring optimal performance across a range of applications. This listing is for the **mechanism only**, requiring additional components such as fixing brackets and accessories for full system installation.

Product Features

- Designed for **Blum AVENTOS HK-XS lift systems**
- Integrated **BLUMOTION soft-close mechanism**
- Suitable for **small to medium cabinet applications**
- **Power Factor range 500–1500**
- Smooth upward opening motion
- Mechanism-only configuration

Product Benefits

- Provides **quiet and controlled closing**
- Improves access to cabinet interiors
- Supports space-efficient cabinet design
- Ensures stable and reliable door movement

- Allows flexible system configuration

Technical Characteristics

- Requires correct **Power Factor selection** based on door size and weight
- Requires additional components for full installation
- Designed for integration within Blum AVENTOS lift system range
- Suitable for various cabinet heights within specified range
- Correct configuration ensures optimal performance

Applications

This lift mechanism is suitable for kitchen wall cabinets, storage units and fitted furniture where compact upward-opening doors are required. It is particularly effective in small to medium cabinet configurations, providing smooth operation, reliable performance and improved accessibility in residential and light commercial environments.
