Bluetooth Control Module for Smart Power Supply

Variant code: LDX24BT

The **Bluetooth Control Module for Smart Power Supply** is an intelligent accessory designed to add Bluetooth connectivity to compatible **Domus Line Smart Power Supplies**. Once installed, it enables connected LED luminaires to be controlled wirelessly using the **DOMUS4U app** on a compatible smartphone or tablet, providing convenient lighting control without the need for additional wired controls.

The module activates the Smart Power Supply's Bluetooth functionality, allowing users to operate compatible luminaires directly from the DOMUS4U app. Its plug-and-play design integrates seamlessly with the Smart Power Supply, providing an easy way to upgrade compatible furniture lighting installations with modern wireless control.

Compact and simple to install, the Bluetooth Control Module is ideal for residential and commercial applications where convenient app-based lighting control is required. It forms part of the Domus Line Smart Lighting ecosystem, allowing compatible lighting systems to be expanded as project requirements evolve.

Product Features

- Bluetooth control module for compatible Domus Line Smart Power Supplies
- Enables wireless control via the DOMUS4U app
- Simple plug-and-play installation
- Activates Bluetooth functionality within the Smart Power Supply
- Compatible with supported Domus Line Smart Lighting systems
- Allows smartphone and tablet control of connected LED luminaires
- Compact design for discreet installation

Product Benefits

- **Adds Bluetooth connectivity to compatible Domus Line Smart Power Supplies**
- **Control compatible LED luminaires directly from the DOMUS4U app**
- **Quick plug-and-play installation with**
