Blum Aventos HL Oval Cross Stabiliser - Cabinet Width 1277mm

Variant code: 20Q1061UA

Blum Aventos HL Oval Cross Stabiliser - Cabinet Width 1277mm is designed to provide enhanced stability and synchronisation for AVENTOS HL parallel lift systems in wide cabinet applications. Engineered as part of Blum's lift system platform, this stabiliser ensures smooth and balanced movement of cabinet fronts across larger widths.

The oval cross stabiliser connects both sides of the lift system, allowing the mechanisms to operate in a synchronised manner. This is particularly important in wide cabinets, where uneven force distribution can lead to misalignment or inconsistent movement. By maintaining coordinated operation, the stabiliser supports long-term reliability and consistent performance.

Designed for **cabinet widths up to 1277mm**, the stabiliser uses a corresponding rod length (typically **1061mm**) to suit the application. It integrates seamlessly with compatible AVENTOS HL lift mechanisms, ensuring accurate installation and dependable system performance.

Product Features

- Designed for **Blum AVENTOS HL lift systems**
- **Oval cross stabiliser rod** for wide cabinet applications
- Suitable for **cabinet width 1277mm**
- Synchronises left and right lift mechanisms
- Improves system stability and alignment
- Durable construction for long-term performance

Product Benefits

- Ensures smooth and balanced door movement
- Prevents misalignment in wide cabinet fronts
- Enhances long-term system reliability
- Supports consistent lift system performance

Tel: 01626 333900

- Reduces stress on individual components
- Improves overall cabinet functionality

Technical Characteristics

- Compatible with **AVENTOS HL lift systems**
- Designed for cabinet width up to 1277mm
- Corresponding stabiliser rod length approx. 1061mm
- Connects both sides of the lift mechanism
- Required for wider cabinet installations
- Correct installation ensures optimal synchronisation

Applications

This cross stabiliser is suitable for kitchen wall cabinets, storage units and fitted furniture using AVENTOS HL lift systems where cabinet widths reach up to 1277mm. It is particularly effective in wide cabinet installations, ensuring stable, synchronised and reliable operation in both residential and light commercial environments.

Property	Value
Cabinet Profile Width (mm)	1227
Version	Unmounted
Length	1061
