Blum Legrabox Internal Front Fixing Brackets - 'C' Height (177.5mm) - Inner Drawer - Design Element - Stainless Steel

Variant code: ZI7.2CI0NI

Blum LEGRABOX Internal Front Fixing Brackets - Inner Drawer - Design Element are designed to securely connect inner drawer fronts within LEGRABOX drawer systems while maintaining a refined internal appearance. Engineered by Blum for precision and reliability, these brackets form part of the internal drawer configuration, ensuring accurate positioning and stable performance in everyday use.

Configured for **C height (177.5mm)** applications, these fixing brackets are suitable for deeper internal drawers where increased storage capacity is required. They provide a secure interface between the inner drawer front and the drawer assembly, ensuring consistent alignment and smooth operation when used with compatible LEGRABOX drawer sides and runners.

As a **design element**, these brackets support a clean and coordinated internal drawer aesthetic while delivering the structural performance required for long-term use. Designed to integrate seamlessly within the LEGRABOX system, they contribute to a complete drawer solution that combines functionality with refined design.

Product Features

- Designed for **Blum LEGRABOX drawer systems**
- Suitable for **inner drawer front fixing**
- **C height configuration** for deeper internal drawers
- Integrated **design element** for refined appearance
- Provides secure and stable front connection
- Precision-engineered for accurate alignment

Product Benefits

- Ensures secure fixing of inner drawer
