Blum Legrabox Steel Back - 'M' Height (90.5mm) - Orion Grey - 1000mm

Variant code: ZB7M932SOG

Blum LEGRABOX Steel Back - 'M' Height 90.5mm - Orion Grey is designed to form the rear structural component of LEGRABOX drawer systems, ensuring accurate alignment and dependable performance across a wide range of cabinet configurations. As part of Blum's premium drawer platform, this steel back integrates seamlessly with LEGRABOX drawer sides, supporting consistent assembly and long-term durability.

The **M height (90.5mm)** configuration is suited to standard drawer applications where a balanced drawer profile is required. Its precision-engineered design ensures a secure connection between drawer sides while maintaining the system's slim, straight-lined aesthetic. The steel back contributes to the overall rigidity of the drawer, supporting smooth operation when paired with compatible LEGRABOX runners and components.

Available in multiple **cabinet width configurations**, the steel back allows the drawer system to be specified according to cabinet dimensions and application requirements. The durable **Orion Grey finish** provides a consistent and contemporary appearance, aligning with the wider LEGRABOX system for a cohesive internal cabinet design.

Product Features

- Designed for **Blum LEGRABOX drawer systems**
- **M height (90.5mm)** drawer back configuration
- Available for multiple **cabinet widths**
- Durable **Orion Grey finish**
- Precision-engineered steel construction
- Seamless integration with LEGRABOX drawer sides

Product Benefits

- Provides strong and stable rear drawer support
- Ensures consistent alignment across

drawer components
- Supports clean and uniform internal drawer appearance
- Allows flexibility across different cabinet sizes
- Enhances overall drawer stability and performance
- Complements modern cabinetry aesthetics

Technical Characteristics

- Designed for use with **LEGRABOX drawer sides and runners**
- Cabinet width must match drawer system configuration
- Requires appropriate fixing components for installation
- Steel construction with protective coated finish
- Precision-manufactured for consistent fit and alignment
- Correct system pairing ensures optimal drawer performance

Applications

This steel back is suitable for kitchen, bedroom and fitted furniture drawer systems using Blum LEGRABOX components. The M height configuration is commonly used in standard drawer applications where a balanced drawer depth and profile are required. Available across multiple cabinet widths, it supports a wide range of cabinetry layouts, making it suitable for both residential and light commercial projects requiring durable, high-quality drawer construction.
