

Blum Clip Top Hinge – 155° Nil Protrusion Overlay Sprung – Onyx Black – Screw-on

Variant code: 71T7500N-OB

Blum CLIP top – 155° Overlay Sprung Hinge – Onyx Black is designed to deliver extended opening access and reliable self-closing performance in overlay cabinet applications. Featuring an integrated **sprung mechanism**, the hinge provides controlled and consistent closing action without additional components. The wide **155° opening angle** improves visibility and reach within cabinet interiors, making it particularly suitable for installations where increased door clearance is required.

Designed for **overlay cabinet doors**, the final overlay dimension is determined by mounting plate selection, allowing flexibility across a range of cabinet constructions. As part of the Blum CLIP top system, the hinge clips securely onto compatible mounting plates using a tool-free attachment method, enabling efficient installation and straightforward adjustment. Three-dimensional adjustment allows precise vertical, lateral and depth positioning to achieve accurate alignment and consistent door gaps.

The integrated **Screw-On boss fixing** provides secure mechanical retention within the door and requires accurate hinge cup drilling preparation. This traditional fixing method ensures dependable anchoring within standard cabinet door materials. Finished in durable **Onyx Black**, the hinge supports coordinated specification in contemporary dark cabinetry while maintaining full compatibility within the Blum hinge platform.

Product Features

- **155° wide opening angle** for enhanced cabinet access
- Integrated **sprung mechanism** for self-closing action
- Designed for **overlay door applications**
- **Screw-On boss fixing**
- Durable **Onyx Black finish**

- Compatible with Blum **CLIP top mounting plates**
- Tool-free clip-on hinge assembly
- Three-dimensional adjustment capability

Product Benefits

- Provides improved interior access compared to standard hinge angles
- Delivers reliable and consistent self-closing performance
- Supports clean overlay cabinet aesthetics
- Ensures secure hinge retention with mechanical fixing
- Enables precise alignment and even door gaps
- Coordinates visually with modern dark cabinetry designs

Technical Characteristics

- Requires compatible Blum CLIP top mounting plates
- Screw-On boss requires correct hinge cup drilling preparation
- Adjustable vertically, laterally and in depth
- Designed for integration within Blum cabinet systems
- Suitable for overlay cabinet constructions requiring increased opening
- Correct hinge and mounting plate pairing ensures optimal performance

Applications

This hinge is intended for overlay cabinet door installations where extended opening access is required. The **155° opening angle** allows improved

reach into storage areas, making it suitable for kitchens, storage units and fitted furniture. The integrated **sprung mechanism** and **Screw-On boss fixing** ensure dependable closing performance, while the **Onyx Black finish** supports contemporary cabinetry schemes in residential and light commercial interiors.

Property	Value
Finish	Onyx Black
Opening angle (°)	155
