Blum Aventos Servo-Drive Distribution Cable - Cut to size - 5 Cable End Protectors

Variant code: Z10K800AE

Maximise efficiency and precision in your automated lift system installations with the genuine **Blum Aventos Servo-Drive Distribution Cable**. This high-quality cable, designed for seamless integration with Blum's Servo-Drive technology, ensures reliable power distribution to your Aventos lift systems.

Key Features & Benefits:

- **Customisable Length:** Eliminate waste and ensure perfect fit with our cut-to-size service. Specify your required length for a tailored solution, optimising your project's material usage.
- **Reliable Performance:** Engineered by Blum, a leader in furniture fittings, this distribution cable guarantees consistent and dependable power delivery to Aventos lift systems.
- **Enhanced Installation:** Includes **5 Cable End Protectors** for secure and professional terminations, safeguarding against damage and ensuring long-lasting performance.
- **Seamless Integration:** Designed for direct compatibility with Blum Aventos Servo-Drive units, streamlining installation and minimising compatibility issues.
- **Increased Project Efficiency:** Simplify complex installations and reduce on-site adjustments with precise cable lengths, saving valuable time and labour.
- **High-Quality Construction:** Built to withstand demanding project environments, ensuring durability and longevity.

Ideal for:

- Kitchen cabinet lift systems
- Wall cabinet automation
- Large-scale residential and commercial projects
- Projects requiring precise, automated lift solutions.
