Blum Clip On - Door Hinge Blumotion - Overlay & Half Overlay - Nickel

Variant code: 973A6000

Blum Clip On - Door Hinge Blumotion - Overlay & Half Overlay is designed to add soft-close functionality to compatible Blum CLIP top hinges used on overlay and half overlay cabinet doors. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, this component upgrades standard hinge installations with controlled closing performance while maintaining the reliability and adjustability associated with the CLIP top hinge system.

The BLUMOTION unit clips directly onto the hinge arm of compatible **Blum CLIP top hinges**, allowing cabinet doors to close smoothly and quietly. During the final stage of closing, the integrated damping mechanism slows the door movement to prevent impact against the cabinet, helping protect both the cabinet structure and door over time. This controlled motion improves everyday usability while contributing to the longevity of cabinet components.

Designed specifically for **overlay and half overlay cabinet door configurations**, the unit integrates neatly with the hinge without affecting hinge alignment or adjustment. The compact clip-on design allows it to be installed quickly, making it suitable for both new cabinet installations and upgrades to existing hinges where soft-close functionality is required.

Manufactured from durable engineered materials with a **nickel-toned finish**, the component blends discreetly with hinge hardware and delivers consistent performance within Blum hinge systems used across modern cabinetry.

Product Features

- Clip-on **BLUMOTION soft-close mechanism** for CLIP top hinges
- Compatible with **overlay and half overlay cabinet doors**
- Designed for use with **Blum CLIP top hinge systems**
- Provides **controlled and quiet door closing**

SWS HARDWARE

- Compact component integrates within hinge arm assembly
- Durable construction with **nickel-toned finish**

Product Benefits

- Upgrades existing hinges with **soft-close functionality**
- Reduces door impact and protects cabinet structures
- Improves cabinet usability and everyday comfort
- Maintains full hinge adjustment capability
- Allows simple installation without replacing hinges
- Suitable for residential and light commercial cabinetry

Technical Characteristics

- Compatible with **Blum CLIP top hinge systems**
- Designed for **overlay and half overlay door configurations**
- **Clip-on installation** directly onto hinge arm
- Integrated **BLUMOTION damping mechanism**
- Engineered for reliable long-term hinge performance
- Designed for integration within **Blum cabinet hardware systems**

Applications

This component is intended for **cabinet doors using Blum CLIP top hinges** where controlled soft-close performance is required. It is commonly used in kitchens, wardrobes and fitted furniture where **overlay or half overlay cabinet doors** are installed. By adding BLUMOTION damping to compatible hinges, it improves closing comfort, reduces noise and helps extend the service life of cabinet components.

Property	Value
Finish	Nickel
Application	Overlay & Half Overlay
