

Button-fix™ – 2020 Router Multijig

Variant code: 171-019-6

The **Button-fix™ 2020 Router Multijig** is a professional routing template designed to simplify the machining of the precision oval recesses required for **rebated Button-fix™ installations**. Manufactured from clear acrylic with printed guide marks, the Multijig enables fast, accurate and repeatable routing, helping installers achieve perfect alignment and a professional concealed fixing every time.

Featuring three clearly labelled routing apertures, the Multijig is compatible with multiple Button-fix™ systems, including **Type 1, Type 1 Flush, Type 1 Bonded and Type 1 Metal Fixes**. The transparent acrylic frame allows the workpiece to remain visible throughout machining, making positioning easier while improving routing accuracy and reducing setup time.

Ideal for cabinet makers, joiners, furniture manufacturers and shopfitters, the Button-fix™ Router Multijig provides a reliable solution for producing consistent rebated installations with minimal effort. Full operating instructions are available from Button-fix™.

Product Features

- Genuine Button-fix™ 2020 Router Multijig
- Designed for machining oval recesses for rebated installations
- Clear acrylic frame provides full visibility of the workpiece
- Printed guide marks for accurate positioning
- Three precision routing apertures
- Compatible with Type 1, Type 1 Flush, Type 1 Bonded and Type 1 Metal Fixes
- Improves routing accuracy and consistency
- Reusable professional routing template
- Suitable for workshop and on-site use
- Operating instructions available from Button-fix™

Product Benefits

- **Produces accurate oval recesses for professional rebated Button-fix™**

installations

- **Transparent acrylic construction improves visibility and positioning during routing**
- **Reduces installation time while delivering consistent machining results**
- One jig supports multiple Button-fix™ fixing systems
- Printed guide marks simplify setup and alignment
- Reusable design provides long-term workshop value
- Ideal for production environments and bespoke joinery
- Helps achieve precise concealed fixing installations with minimal measuring

Technical Characteristics

- Product Type: Router Jig
- Model: Button-fix™ 2020 Router Multijig
- Material: Clear Acrylic
- Application: Routing Oval Recesses for Rebated Installations
- Guide Marks: Printed Alignment Guides
- Routing Apertures: Three
- Compatible Systems: Type 1, Type 1 Flush, Type 1 Bonded and Type 1 Metal Fixes
- Installation Method: Router Template
- Reusable: Yes
- Manufacturer: Button-fix™

Applications

The **Button-fix™ 2020 Router Multijig** is ideal for **cabinet manufacture, architectural wall panelling, acoustic panels, exhibition displays, retail fixtures, bespoke furniture, removable access panels, shopfitting and commercial joinery**. Designed for machining the rebated recesses required by **Button-fix™ Type 1, Type 1 Flush, Type 1 Bonded and Type 1 Metal concealed fixing systems**, it ensures fast, accurate and repeatable routing for professional-quality installations.
