Button-fix™ - Safety Cord - Pack of 30

Variant code: 171-002-4

The **Button-fix™ Safety Cord** is an essential safety accessory designed specifically for use with **Button-fix™ Type 2 concealed fixing systems** where additional security is required. Supplied as a **pack of 30**, each safety cord provides a secondary retention point, helping to prevent removable panels from falling completely away when disengaged for inspection or maintenance.

For vertical panel installations, Button-fix™ recommends fitting **two Safety Cords**, one to each Type 2 Fix located in the upper corners of the panel. Each cord is secured by an additional Button (sold separately), allowing the panel to remain safely suspended while access is gained behind it. To completely remove the panel, simply lift the loop from the Button and disengage the Safety Cord.

Ideal for commercial, residential and public installations, the Safety Cord provides added reassurance in applications where removable panels require enhanced safety during servicing or frequent access.

Product Features

- Genuine Button-fix™ Safety Cord accessory
- Supplied as a pack of 30
- Designed specifically for Button-fix™ Type 2 Fixes
- Provides secondary panel retention during maintenance
- Simple loop attachment design
- Helps prevent panels from falling when released
- Recommended for vertical removable panel installations
- Easy to disconnect for complete panel removal
- Requires an additional Button (sold separately)
- Suitable for professional and commercial installations

Product Benefits

Tel: 01626 333900
