

Button-fix™ – Type 1 – Flush Fix – Pack of 100

Variant code: 171-018-1

The **Button-fix™ Type 1 Flush Fix (No Button)** is a professional concealed fixing connector designed to create strong, removable and completely flush panel installations. Supplied as a **pack of 100 Flush Fix connectors**, this component forms part of the award-winning Button-fix™ system and is designed for use with compatible **Button-fix™ Buttons** (sold separately). Ideal for architects, cabinet makers, shopfitters and furniture manufacturers, it delivers a premium invisible fixing solution with rapid installation and reliable long-term performance.

Specifically engineered for applications where the finished panel must sit perfectly flush against the supporting surface, the Type 1 Flush Fix features a secure **push-on, slide-off** engagement that allows panels to be installed and removed quickly whenever maintenance or future access is required. Manufactured from high-strength engineering polymer and made in the UK, it provides exceptional durability while maintaining a completely hidden fixing.

Suitable for architectural panelling, cabinetry, acoustic panels, signage and retail displays, the Type 1 Flush Fix offers the ideal combination of concealed appearance, installation efficiency and dependable load-bearing performance.

Product Features

- Genuine Button-fix™ Type 1 Flush Fix connector
- Supplied as a pack of 100
- Fix connector only (Buttons sold separately)
- Designed for completely flush panel installation
- 100% concealed fixing system
