

Cabinet Soft Close Damper – Black

Variant code: DSB9000

Cabinet Soft Close Damper is a compact soft-closing device designed to provide smooth, controlled closing for swing cabinet doors. Finished in **Black**, it reduces closing speed to prevent slamming, helping to minimise noise, protect cabinetry and improve the overall user experience. Its discreet design integrates neatly into cabinet interiors while delivering reliable soft-close performance.

Designed primarily for **full overlay doors**, the LDD-S can also be used with the optional **ACC-DAM adapter** to support **half overlay** and **inset door** applications, providing greater installation flexibility across a variety of cabinet styles. Manufactured from durable engineering materials, it delivers consistent damping action and long-lasting performance, making it suitable for both residential and commercial furniture.

Ideal for new cabinet installations or upgrades, the Sugatsune LDD-S offers a simple solution for adding premium soft-close functionality without replacing existing hinges.

Product Features
