

Cabinet Soft Close Damper – Zinc Alloy/Grey

Variant code: DSW9000

Cabinet Soft Close Damper is a premium soft-closing device designed to provide smooth, controlled closing for swing cabinet doors. Featuring a durable **zinc alloy body with a grey finish**, it slows the closing action to prevent slamming, reducing noise and protecting cabinet doors and hardware from unnecessary wear. Its compact design integrates discreetly into cabinetry while delivering reliable soft-close performance.

Designed for **full overlay cabinet doors**, the LDD-V100 can also be used with the optional **ACC-DAM43-Black** adapter to support **half overlay** and **inset door** applications, offering greater flexibility across a wide range of cabinet designs. Manufactured from high-quality materials, it provides consistent damping performance and long service life, making it suitable for both residential and commercial furniture installations.

Ideal for new cabinetry or retrofit projects, the LDD-V100 enhances the functionality and premium feel of cabinets by delivering quiet, controlled door closing without requiring specialised hinges.

Product Features

- Cabinet soft-close damper
- **Zinc alloy body with grey finish**
- Enables smooth, controlled closing of swing doors
- Designed for **full overlay** cabinet doors
- Compatible with **ACC-DAM43-Black** for half overlay and inset doors
