

Cable Grommet, 18mm ø External, 12mm ø Internal, 14.5mm ø Hole – Satin Nickel

Variant code: CGF18SN

18mm Brass Cable Grommet is a compact and stylish cable management solution designed to neatly route cables through desks, worktops, cabinets and office furniture. Featuring an **18mm external diameter**, **12mm internal cable opening** and requiring a **14.5mm mounting hole**, it protects cables from abrasion while providing a clean, professional finish. Manufactured from premium brass, it combines durability with an attractive decorative appearance.

Ideal for routing **telephone, fax and LAN cables**, the grommet helps organise cables while reducing wear caused by sharp furniture edges. Its precision-machined brass construction provides excellent strength and long-lasting performance, making it suitable for both commercial and residential furniture installations. Available in **Antique Brass, Satin Nickel and Polished Brass** finishes, it complements a wide variety of furniture styles and interior designs.

Simple to install, the grommet fits securely into a 14.5mm drilled hole, creating a neat cable outlet while maintaining a professional appearance. It is an ideal solution for desks, conference tables, reception counters and cabinetry where discreet cable management is required.

Product Features

- Premium brass cable grommet
- 18mm external diameter
