

Cable Grommet, 22mm ø External, 15mm ø Internal, 18.5mm ø Hole – Satin Nickel

Variant code: CGF22SN

22mm Brass Cable Grommet provides a neat and professional solution for routing cables through desks, worktops, cabinets and furniture. Designed with a **22mm external diameter, 15mm internal cable opening and 18.5mm mounting hole requirement**, it protects cables from abrasion while creating a clean, finished appearance. Manufactured from high-quality brass, it is suitable for both commercial and residential furniture applications.

Ideal for organising **telephone, fax, LAN, network, power and data cables**, the grommet helps reduce cable wear and keeps workspaces tidy. Its durable metal construction provides long-lasting performance, while the split design allows cables to be installed or removed without disconnecting them. Available in a choice of **Black, Satin Nickel, Antique Brass and Polished Brass** finishes, it complements a wide range of furniture styles and interior finishes.

Simple to install, the cable grommet fits neatly into an 18.5mm drilled hole, providing a secure and attractive cable management solution for desks, office furniture, reception counters, conference tables and cabinetry.

Product Features

- Premium brass split cable grommet
- 22mm external diameter
- 15mm internal cable opening
- Fits an 18.5mm diameter mounting hole
- Suitable for phone, fax, LAN and data cables
