

Central Locking System For Furniture – Set for 3 Drawers – 600mm

Variant code: ALS2100

Central Locking System for Furniture is a premium multi-drawer locking solution designed to secure **three drawers simultaneously** from a single lock. With a **600mm locking bar**, this complete system provides convenient, reliable security for office furniture, filing cabinets and commercial storage units. Engineered for smooth operation and professional installation, it offers an efficient way to protect documents, valuables and equipment while simplifying everyday access.

The central locking mechanism operates all drawers on one side of a cabinet using a single key, eliminating the need to lock each drawer individually. The system is available with **12 key changes**, allowing different locking combinations where required, while remaining compatible with other **Sugatsune 2100 Lock Series** products for shared key systems. The adjustable lock pin position allows the shelf or drawer depth to be fine-tuned during installation, providing greater flexibility across different furniture designs.

Designed for cabinet manufacturers, office furniture installers and commercial fit-out specialists, the Sugatsune Central Locking System combines robust construction, reliable operation and convenient centralised security, making it ideal for modern furniture applications requiring efficient drawer locking.

Product Features

- Central locking system for furniture
