Blum Clip Top Hinge - 155° Nil Protrusion Half Overlay Sprung - Nickel - Screw-on

Variant code: 71T7600N

Blum Clip Top Hinge - 155° Nil Protrusion Half Overlay Sprung - Nickel is designed to deliver extended opening access and reliable self-closing performance in half overlay cabinet applications. Incorporating an integrated **sprung mechanism**, the hinge provides controlled and consistent closing action without additional components. The wide **155° opening angle** improves accessibility to cabinet interiors, making it particularly suitable for installations where greater door clearance is required.

Designed for **half overlay cabinet doors**, the hinge allows adjacent doors to share a central cabinet panel while maintaining accurate alignment and consistent reveals. This configuration supports efficient cabinet layouts in multi-door installations. As part of the Blum CLIP top system, the hinge clips securely onto compatible mounting plates using a tool-free attachment method, enabling efficient installation and simplified adjustment. Three-dimensional adjustment allows precise vertical, lateral and depth positioning to achieve accurate alignment and consistent door gaps.

The integrated **Screw-On boss fixing** provides secure mechanical retention within the door and requires accurate hinge cup drilling preparation. This fixing method ensures dependable anchoring within standard cabinet door materials. Manufactured from durable nickel-plated steel, the hinge offers a clean and neutral finish suitable for a wide variety of cabinetry styles while maintaining compatibility within the Blum hinge platform.

Product Features

- **155° wide opening angle** for enhanced cabinet access
- Integrated **sprung mechanism** for self-closing action
- Designed for **half overlay door applications**

- **Screw-On boss fixing**
- Durable **nickel-plated steel finish**
- Compatible with Blum **CLIP top mounting plates**
- Tool-free clip-on hinge assembly
- Three-dimensional adjustment capability

Product Benefits

- Provides improved interior access compared to standard hinge angles
- Delivers reliable and consistent self-closing performance
- Supports efficient cabinet layouts using shared panels
- Ensures secure hinge retention with mechanical fixing
- Enables precise alignment and even door gaps
- Suitable for residential and light commercial interiors

Technical Characteristics

- Requires compatible Blum CLIP top mounting plates
- Screw-On boss requires correct hinge cup drilling preparation
- Adjustable vertically, laterally and in depth
- Designed for integration within Blum cabinet systems
- Suitable for half overlay cabinet constructions requiring increased opening
- Correct hinge and mounting plate pairing ensures optimal performance
