# Blum Clip Top - 86° Opening Angle Stop for 107° Hinge - Black

**Variant code: 74.1103**

**Blum CLIP top - 86° Opening Angle Stop for 107° Hinge** is designed to limit the opening range of compatible Blum CLIP top 107° hinges where controlled door movement is required. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, this accessory helps manage cabinet door travel in installations where a full hinge opening could interfere with adjacent cabinets, walls or internal fittings.

The restrictor inserts directly into the hinge mechanism, reducing the maximum opening angle from **107° to approximately 86°**. By limiting the door travel, it helps prevent cabinet doors from striking neighbouring surfaces or internal cabinet components while maintaining smooth hinge operation.

Designed specifically for use with **Blum CLIP top 107° hinges**, the restrictor integrates neatly within the hinge assembly without affecting hinge alignment or adjustment capability. Its compact design allows quick installation either during hinge assembly or when retrofitting existing hinges where reduced door opening is required.

Manufactured from durable engineered material, the opening angle stop maintains the reliability and long-term performance associated with Blum cabinet hardware systems while providing improved control of cabinet door movement.

## Product Features

- Opening angle restrictor for **Blum CLIP top 107° hinges**
- Limits hinge opening from **107° to approximately 86°**
- Compact insert designed for hinge integration
- Helps control cabinet door movement
- Quick installation during hinge assembly or retrofit
- Durable engineered construction

## Product Benefits

Tel: 01626 333900
Email: info@swshardware.com

- Prevents cabinet doors from over-opening
- Protects adjacent cabinets, walls and internal fittings
- Improves control of door movement in tight installations
- Maintains smooth hinge performance
- Allows easy retrofit to existing hinge installations
- Supports long-term durability of cabinet components

## Technical Characteristics

- Compatible with **Blum CLIP top 107° hinges**
- Restricts hinge opening angle to approximately **86°**
- Designed to fit within the hinge mechanism
- Does not affect hinge adjustment capability
- Engineered for integration within Blum cabinet hardware systems

## Applications

This opening angle stop is intended for cabinetry using **Blum CLIP top 107° hinges** where door opening must be restricted to prevent interference with nearby cabinets, appliances or interior fittings. It is commonly used in kitchens, wardrobes and fitted furniture where limited space requires controlled door movement while maintaining reliable hinge performance.
