Blum Clip Top - 92° Opening Angle Restrictor for 155° Wide Angle Hinge - Nickel

Variant code: 70T7503N09

Blum Clip Top - 92° Opening Angle Restrictor for 155° Wide Angle Hinge is designed to limit the opening range of compatible Blum CLIP top 155° wide-angle hinges where tighter door control is required. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, this accessory helps manage cabinet door movement in installations where a full hinge opening may interfere with adjacent cabinets, walls, appliances or internal storage systems.

The restrictor integrates directly into the hinge mechanism, reducing the maximum opening angle from **155° to approximately 92°**. By limiting the door travel, it helps prevent cabinet doors from opening too far and contacting nearby surfaces or fittings. This controlled movement helps protect cabinetry components while maintaining the smooth and reliable operation associated with Blum CLIP top hinge systems.

Designed specifically for use with **Blum CLIP top 155° wide-angle hinges**, the restrictor fits neatly within the hinge assembly without affecting hinge alignment, installation or adjustment capability. Its compact insert design allows quick installation during hinge assembly or retrofitting to existing hinges where restricted door movement is required.

Manufactured from durable engineered material, the opening angle restrictor supports the long-term reliability expected from Blum cabinet hardware systems while providing improved control of cabinet door movement.

Product Features

- Opening angle restrictor for **Blum CLIP top 155° wide-angle hinges**
- Reduces hinge opening from **155° to approximately 92°**
- Compact insert designed for hinge integration
- Helps control cabinet door movement
- Quick installation during hinge assembly or retrofit

- Durable engineered construction

Product Benefits

- Prevents cabinet doors from over-opening
- Protects adjacent cabinets, walls and internal fittings
- Improves control of door movement in restricted spaces
- Maintains smooth hinge performance
- Allows simple retrofit to existing hinge installations
- Supports long-term durability of cabinet components

Technical Characteristics

- Compatible with **Blum CLIP top 155° wide-angle hinges**
- Restricts hinge opening angle to approximately **92°**
- Designed to install within the hinge mechanism
- Does not affect hinge adjustment capability
- Engineered for integration within Blum cabinet hardware systems

Applications

This opening angle restrictor is used in cabinetry where **Blum CLIP top 155° wide-angle hinges** are installed but the door opening must be limited to prevent interference with nearby cabinets, appliances or interior fittings. It is commonly specified in kitchens, wardrobes and fitted furniture where controlled door movement is required while maintaining reliable hinge performance.
