Blum Clip Top Hinge - 95° Thick Door Inset Sprung - Nickel - Screw-on

Variant code: 71T9750

Blum CLIP top Hinge - 95° Thick Door Inset Sprung - Nickel is engineered for cabinet doors where increased door thickness requires specialised hinge geometry to maintain correct movement and alignment. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, this hinge forms part of the reliable **CLIP top hinge system**, designed to combine dependable mechanical performance with efficient installation and adjustment. The integrated sprung mechanism provides consistent self-closing action, ensuring cabinet doors close smoothly and reliably during everyday use.

The hinge features a **95° opening angle**, allowing controlled access to cabinet interiors while maintaining stable hinge operation in installations involving thicker doors. Designed specifically for **inset cabinet door configurations**, the hinge allows the door to sit flush within the cabinet frame while providing the clearance required for thick door constructions. The hinge attaches securely to compatible Blum mounting plates using the **tool-free CLIP top attachment system**, enabling quick installation and simple removal when adjustment or maintenance is required.

Manufactured from durable steel with a **nickel-plated finish**, the hinge offers corrosion resistance and a clean, neutral appearance suitable for a wide range of cabinet interiors. The hinge cup design is **compatible with different boss fixing types depending on the selected variant**, allowing flexibility during installation based on cabinet material, drilling preparation and production requirements.

Product Features

- **95° opening angle** suitable for thick door cabinet installations
- Integrated **sprung self-closing mechanism**
- Designed for **inset cabinet door applications**
- Suitable for **thick cabinet door constructions**

SWS HARDWARE

- Compatible with **multiple boss fixing types depending on variant**
- Durable **nickel-plated steel construction**
- **Tool-free CLIP top hinge attachment**
- **Three-dimensional adjustment capability**

Product Benefits

- Provides reliable **self-closing hinge performance**
- Allows installation on **thicker cabinet doors** without compromising movement
- Supports precise and clean **flush inset cabinet design**
- Enables installation flexibility through **different boss fixing options**
- Allows accurate door alignment and consistent reveals
- Delivers dependable performance in residential and light commercial cabinetry

Technical Characteristics

- Requires compatible **Blum CLIP top mounting plates**
- Supports **different boss fixing types depending on variant**
- Adjustable vertically, laterally and in depth
- Steel hinge construction with **nickel-plated protective finish**
- Designed for integration within **Blum cabinet hardware systems**
- Correct hinge and mounting plate pairing ensures optimal hinge performance

Applications

This hinge is suitable for **inset cabinet doors with increased door thickness** used in kitchens, wardrobes, storage cabinets and bespoke furniture installations. The specialised hinge geometry supports thicker door constructions while maintaining smooth hinge operation and accurate alignment. The integrated **sprung mechanism** ensures reliable self-closing action, while compatibility with **different boss fixing types depending on variant** allows installation across a wide range of cabinet materials and manufacturing methods.
