# Blum Clip Top - Door Hinge Blumotion - Half Overlay - Nickel

**Variant code: 973A0600**

**Blum Clip Top - Door Hinge Blumotion - Half Overlay** is designed to add integrated soft-close functionality to compatible Blum CLIP top hinges used on half overlay cabinet doors. Manufactured by **Blum**, a globally recognised specialist in cabinet hardware, this component enhances cabinet performance by delivering controlled and quiet door closing while maintaining the precision and adjustability of the CLIP top hinge system.

The BLUMOTION unit clips directly onto the hinge arm of compatible **Blum CLIP top hinges**, providing smooth and controlled closing during the final stage of door movement. The integrated damping mechanism slows the door before contact with the cabinet, preventing impact and reducing operational noise. This improves daily usability while helping protect cabinet doors and furniture structures from repeated stress over time.

Designed specifically for **half overlay cabinet door configurations**, the unit integrates neatly with the hinge without affecting hinge adjustment or alignment. The compact clip-on design enables straightforward installation, making it suitable for both new cabinetry projects and retrofitting existing hinge installations where soft-close functionality is required.

Manufactured from durable engineered materials with a **nickel-toned finish**, the component blends discreetly with hinge hardware and maintains full compatibility within Blum CLIP top hinge systems widely used in modern cabinetry.

## Product Features

- Clip-on **BLUMOTION soft-close mechanism** for CLIP top hinges
- Compatible with **half overlay cabinet door applications**
- Designed for use with **Blum CLIP top hinge systems**
- Provides **smooth and quiet door closing**
- Compact component integrates within hinge arm assembly

- Durable construction with **nickel-toned finish**

## Product Benefits

- Adds **soft-close functionality** to compatible hinge installations
- Reduces noise and protects cabinet structures
- Improves cabinet usability and everyday comfort
- Maintains full hinge adjustment capability
- Allows quick installation without replacing hinges
- Suitable for residential and light commercial cabinetry

## Technical Characteristics

- Compatible with **Blum CLIP top hinge systems**
- Designed for **half overlay cabinet door configurations**
- **Clip-on installation** directly onto hinge arm
- Integrated **BLUMOTION damping mechanism**
- Engineered for consistent long-term hinge performance
- Designed for integration within **Blum cabinet hardware systems**

## Applications

This component is intended for **cabinet doors fitted with Blum CLIP top hinges** where soft-close functionality is required in **half overlay cabinet installations**. It is commonly used in kitchens, wardrobes and fitted furniture where two doors share a central cabinet panel. By adding BLUMOTION damping to compatible hinges, it improves closing comfort, reduces noise and supports the long-term durability of cabinet components.
