Blum Clip Top - Door Hinge Blumotion - Overlay - Nickel

Variant code: 973A0500

Blum Clip Top - Door Hinge Blumotion - Overlay - Nickel is designed to add integrated soft-close functionality to compatible Blum CLIP top hinges used on overlay cabinet doors. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, this component enhances cabinet usability by delivering smooth, controlled closing while maintaining the reliability and adjustment capability of the CLIP top hinge system.

The BLUMOTION unit clips directly onto the hinge arm of compatible **Blum CLIP top hinges**, allowing cabinet doors to close gently and quietly. During the final stage of closing, the integrated damping mechanism slows the door movement to prevent impact with the cabinet structure. This controlled motion reduces operational noise, protects cabinet doors and hinges from repeated stress, and improves everyday user comfort.

Designed specifically for **overlay cabinet door configurations**, the unit integrates seamlessly with the hinge without affecting hinge alignment or adjustment. The compact clip-on design allows fast installation, making it suitable for both new cabinetry projects and retrofitting existing CLIP top hinge installations where soft-close performance is required.

Manufactured from durable engineered materials with a **nickel finish**, the component blends discreetly with hinge hardware while maintaining full compatibility within the Blum CLIP top hinge platform widely used across modern cabinetry.

Product Features

- Clip-on **BLUMOTION soft-close mechanism** for CLIP top hinges
- Compatible with **overlay cabinet door applications**
- Designed for use with **Blum CLIP top hinge systems**
- Provides **smooth and quiet door closing**
- Compact component integrates within hinge arm assembly
- Durable construction with **nickel finish**

Product Benefits

- Adds **soft-close functionality** to compatible hinge installations
- Reduces noise and protects cabinet structures
- Improves cabinet usability and closing comfort
- Maintains full hinge adjustment capability
- Allows simple installation without replacing hinges
- Suitable for residential and light commercial cabinetry

Technical Characteristics

- Compatible with **Blum CLIP top hinge systems**
- Designed for **overlay cabinet door configurations**
- **Clip-on installation** directly onto hinge arm
- Integrated **BLUMOTION damping mechanism**
- Engineered for reliable long-term hinge performance
- Designed for integration within **Blum cabinet hardware systems**

Applications

This component is intended for **cabinet doors fitted with Blum CLIP top hinges** where controlled soft-close performance is required in **overlay cabinet installations**. It is commonly used in kitchens, wardrobes and fitted furniture where smooth, quiet door closing enhances the overall cabinet experience while helping extend the service life of cabinet components.
